EDUCATION

University of Chemistry and Technology (UCT)

Master's degree in Food Technology

Bachelor's degree in Food Technology

Prague, Czechia

2019 – 2021

2016 – 2019

PROJECTS

Personal Travel Blog & Journal | React, Vite, Firebase, Netlify, dnd-kit, Tiptap, Open-Meteo API

-  Blog |  Editor
- Built a full-stack travel blog and journal web app with a rich-text editor, hosted on Firebase and Netlify.
- Used React/Vite to create a fast, responsive frontend, including a separate drag-and-drop editor with Tiptap and dnd-kit.
- Implemented secure user sign-in with Firebase Authentication and used Cloud Firestore as a real-time database to store and sync content.
- Hosted images on Google Drive for simple and accessible storage and integrated the Open-Meteo API to display live weather updates for travel locations.

The Odin Project – Full Stack JavaScript Curriculum | JavaScript, Git, GitHub, Webpack, Fetch API

-  The Odin Project portfolio
- Developed responsive layouts using HTML5, CSS3, and JavaScript, focusing on event handling, modular code architecture, and dynamic content via API integration.
- Utilized Git, GitHub, and Webpack for project management while applying UI/UX principles to create accessible and user-friendly interfaces.
- Delivered projects including a landing page, portfolio website, weather dashboard, To-Do List, and a CV Application for résumé generation.

EXPERIENCE

R&D Assistant

Biomedica spol. s r.o.

August 2021 – August 2022

Horatev, Czechia

- Prepared formulas for capsule supplements by calculating precise ingredient amounts
- Managed lab schedules and daily operations to keep the R&D lab running smoothly
- Created and reorganized both physical and digital documentation to improve department workflows
- Maintained inventory and organized samples to ensure efficient tracking
- Handled customer inquiries and coordinated sample distribution while collaborating with technologists and sourcing departments to support product development.

Laboratory Assistant (Intern)

Polabske Mlekarny a.s.

August 2020 – September 2020

Podebrady, Czechia

- Performed routine quality control tests on dairy products, including fat content, pH, and stability
- Ensured compliance with industry standards through accurate analytical testing
- Carried out a small research project comparing fat measurement methods (ATR-FTIR vs. Gerber Method) in a production setting
